

Skylight Shade Measuring Guide

Use this handy guide to keep track of your Skylight shade window measurements. For details and tips for measuring, download the How to Measure Guide on our website.

When measuring for a skylight shade, make sure you measure the **diagonal measurements** (top right corner to bottom left corner and top left corner to bottom right corner). If those measurements differ by more than ¼" you will need to shim your window to accommodate the track system.

Room:		Shade Color:		Window Number:	
Measurement	Measure #1	Measure #2	Measure #3	Diagonal Measurements	
Width (Inches): Circle Narrowest				Top Left to Bottom Right Measurement:	Top Right to Bottom Left Measurement:
Length (Inches): Circle Shortest					
Room:		Shade Color:		Window Number:	
Measurement	Measure #1	Measure #2	Measure #3	Diagonal Measurements	
Width (Inches): Circle Narrowest				Top Left to Bottom Right Measurement:	Top Right to Bottom Left Measurement:
Length (Inches): Circle Shortest
